Scenario:

A University of South Carolina Senior went to a couple bars in 5 points during the pandemic. He/She is feeling sick and has symptoms for Covid-19.

Task 1: Create an account on Covid-19 Tracker.

Task 2: Use symptoms checker to check and see if he/she has Covid.

Task 3: Find a virtual doctor to see what they recommend.

Task 4: If the doctor recommends to take a Covid test then schedule an appointment to get tested through the app.

What changes should you make to your application?

1. I think we should provide the service for all college students across the Nation based on the University or College they attend.
2. Make the user interface easier so the user can easily navigate.
3. Add a tab to add the insurance so the payment is easier for students in their busy lifestyle.
4. Let students without insurance pay from the app.
5. Health history.
6. In order to do all of the above we need to change the name of the app.

What do you need to keep the same for your application?
1. Finding the doctors tab.
2. Symptoms Checker.
3. Easily Appointment Scheduling.
